

Strap-on Catheterization / Enema Simulator

MW54 11435-000 (female)

MW53 11434-000 (male)

MW55 11436-000 (value set)

Reality in skills training combined with scenarios for communication.

Features

- ✓ Soft female genitalia permits holding the labia in open position throughout the procedure from sterilization to the placement of the catheter.
- ✓ Anatomically correct structure facilitates acquiring body sense along with the procedure.
- ✓ Compatible with balloon catheters. Water (simulated urine) flows out when appropriate length of a catheter is inserted.

Specifications

Life-sized genitalia model
